Drum Clamp Band (DCB)

The drum clamp band has been designed to offer a secure lifting point for drums that are either thin walled or made from soft material such as card or fibre board. The Ring secures around the top of the drum under the top lift and provides a solid section for the lifting straps to be mounted from. The attachment can then be lifted via a crane or hook. This attachment is particularly useful for drums that are used with liquid bags.

- Grips drum firmly under the lip
- Simple design with few moving parts – low maintenance
- Supplied with 50mm wide duplex webbing lifting straps
- Low impact pressure on drum – suitable for thin walled drums

Model Ref	Capacity	Drum Type	Weight
DCB-1	360kgs	1,2 & 3	12kgs
