Mauser Drum Grab (FDHM)

The Mauser drum handler is designed for handling 'Egg Shaped' 210 litre plastic mauser drums. Fully automatic in operation, the mauser drum handler grips the drum at the base and when lifted, the weight holds the drum in place. An upright support also helps provide stability to the drum whilst being lifted. With 'T' screw retaining clamps for safe securing the drum handler to the forklift forks, the mauser drum handler comes 'CE' marked, fully tested and certified to comply with the latest Health & Safety Regulations.

Model Ref	Capacity	Drum Type	Max Fork Size	Fork Spread
FDHM-1	400kgs	4	130mm x 70mm	585mm

- Fully automatic in operation
- Zinc plated 'T' screws for retention
- Blue glow powder coated finish
- Suitable for 210 litre Mauser drums
- Ample sized fork pockets
