### Fork Mounted Jib

### (FMJ)

The Fork Mounted Jib is a fixed length jib which mounts onto the forks of the fork truck. The ideal attachment for lifting and conveying loads which are not suitable for, or do not require palletising. Supplied with a hook & shackle which can be placed at any of the given load centres. The fork mounted jib offers the ability to safely lift varying loads at varying load centres.

The fork mounted jib has four lifting points, starting at 1000mm, with the final lifting position at 1750mm, intermediate holes positioned at 1250mm and 1500mm.

Bowl of hook hangs 70mm above fork blade

Model Ref	Truck Capacity	A	B	C	D	Weight
