Fixed Blade Snow Plough

(FMP)

Fork Mounted Snow Ploughs offer a fixed blade position which clears the snow to the right. The bottom of the blade on the snow plough is protected by a rubber blade insert.

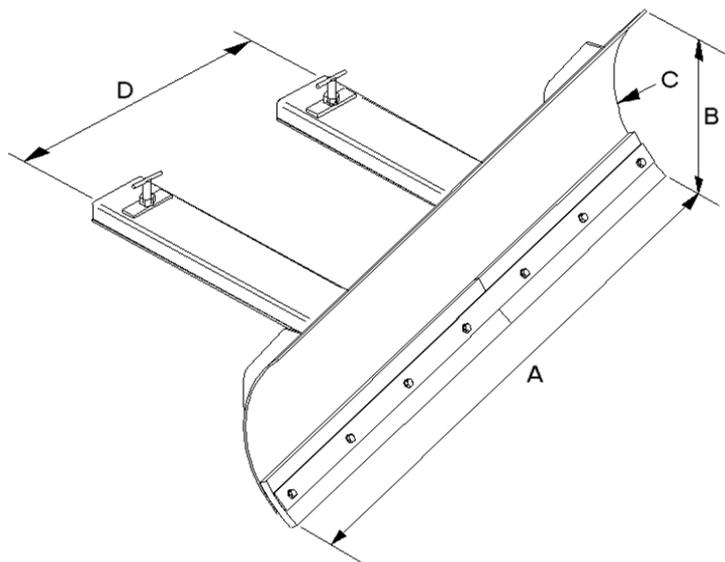

Fork Mounted Snow Plough should be pushed along with the blade wear strip just in contact with the surface to be cleared.

To fit; simply ensure screw clamps are loosened enough to allow fork entry, then simply drive the truck slowly forwards into the pockets until as far in as possible. Then simply re-tighten the screw clamps.

The lift chains should be kept taut, supporting the weight of the forks and the attachment, particularly when castors are fitted

Model Ref	A	B	C	D	Max Fork Size
FMP-1220-R	1220mm	550mm	380mm	830mm	140mm x 50mm
FMP-1525-R	1525mm	550mm	380mm	830mm	140mm x 50mm
FMP-1830-R	1830mm	550mm	380mm	830mm	140mm x 50mm
FMP-2130-R	2130mm	550mm	380mm	830mm	140mm x 50mm

Model Ref	Weight
FMP-1220-R	95kgs
FMP-1525-R	106kgs
FMP-1830-R	117kgs
FMP-2130-R	129kgs
