Towable Salt Spreader

(SSM)

The forklift towable salt spreader is perfect for towing behind vehicles with standard ball hitch or towing pins. With no electrical or auxiliary valve connection required to the forklift, this mechanically driven salt gritter is simple yet effective to use for all ice gritting applications. With a large 190 litre capacity hopper and flow control lever, the forklift towable salt spreader will ensure your operations keep moving during the winter months.

An added benefit of the forklift towable salt gritter is that during the summer months, the unit can also be used as seed spreader.

Model Ref	Type of Salt	Capacity	Hopper Width	Hopper Height	Overall Height	Weight
SSM 190	Dry White Rock Salt	190 Litre	860mm	590mm	1120mm	90kgs
